

Senior SQL Developer/ Database Administrator

As a leading property investment and management company Pier Management Ltd are seeking a senior SQL developer/ DBA to help drive improvements and efficiency into the business reporting functions.

This is a full-time role working as part of a wider team with the overarching objective of implementing improvements to the reporting and analytics of data across all facets of the business. This is a busy and critical area for the business and it will give the successful candidate the opportunity to develop and broaden their commercial awareness.

Tasks:

- Day to day tasks will involve modifying and extending existing reports and ETL processes, as well as developing new reports and processes. Most reporting will involve working closely with the wider business, either to assist with operational targets and monitoring, or to inform the company's strategic decision making.
- Oversee, promote and improve our use of SQL database reporting
- Oversee / deliver training both formally and informally to existing staff to improve the general knowledge and understanding of SQL report writing.
- Producing bespoke reports, routines and workflows to help streamline the various departments daily workload.
- Work closely with the database and reporting team to ensure our data is cleansed and stored efficiently

Requirements/ Technical ability/ Knowledge:

- Ideally you have 3 or more years commercial experience in a SQL focused role, preferably using SQL/SQL Server/SSMS
- System and database administration to automate routine tasks
- Microsoft SQL Server 2014+
- Microsoft SQL Server Reporting Services (SSRS)
- Microsoft SQL Server Integration Services (SSIS)
- Data Warehouse based on the Kimball methodology
- Advanced Excel Data Modelling and Power Query (Advantageous)
- Power BI (Advantageous)
- Writing Excel Macros (solid VBA skills)
- Confidence to manage your stakeholder expectations and introduce new ideas
- A Further qualification in software development or coding is desirable.
- Minimum 3 A*-C's at A-level or equivalent further education.
- Strong knowledge of Excel, VBA and analytical skills are necessary for this role.
- Experience working with 3rd Party API's.

Benefits:

- Hybrid working
- Private medical insurance
- CPD funding
- Annual bonus scheme
- Employee of the month scheme
- Pension

Salary:

- £45-50k
- Full time role (9am- 5:30pm)
- Role based in Southend on Sea, Essex, Hybrid working is an option

Working environment:

A vibrant office with a culture of nurturing and developing staff. Success, hard work and innovation are both celebrated and rewarded. We are a conscientious business with strong working practices and a focus on delivering top level customer service for both our clients and customers.

Our office is located in the heart of Southend on Sea with good transport links, easy access to parks, shops, restaurants and the seafront.
